EDUCATION

University of North Carolina at Chapel Hill

Bachelor of Science, Computer Science | GPA: 3.7/4.0

Chapel Hill, NC, USA

2022 - 2026

TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript, SQL, Apex

Frameworks & Libraries: React, Flask, FastAPI

Tools: Git, Jira

Technologies: Salesforce, Salesforce Experience Cloud

Databases: PostgreSQL, SQLite, SOQL

EXPERIENCE

Software Engineering Intern

June 2025 – August 2025

Pearson

Durham, NC

- Migrated a legacy Salesforce app to Experience Cloud, launching a scalable external-facing portal that improved UX, streamlined workflows, and reduced licensing costs by over \$100K annually.
- Developed responsive homepage and checkout interfaces from Figma designs using Lightning Web Components (LWC) within an agile, open-ended development cycle.
- Collaborated with cross-functional stakeholders to gather feedback, identify pain points, and deliver iterative improvements aligned with business needs.
- Presented outcomes to product leadership, demonstrating enhanced user experience, streamlined workflows, and faster alert resolution (by about 5 days) leading to new revenue opportunities.

Undergraduate Teaching Assistant

August 2023 – January 2025

UNC Department of Computer Science

Chapel Hill, NC, USA

- Led office hours to support students in Python and Java programming, reinforcing concepts in data structures, recursion, and algorithms.
- Evaluated coding assignments, problem-solving exercises, and exams according to predetermined criteria.
- Provided one-on-one mentorship and debugging guidance, helping students translate conceptual understanding into working code.

Salesforce Developer Intern

June 2022 - August 2022

Neuraflash LLC

West Palm Beach, FL, USA

- Collaborated across teams to design and implement Salesforce solutions tailored to client requirements.
- Gained hands-on experience with Lightning Component Framework while learning new Salesforce features to address business challenges.

PROJECTS

pit · peak · buffalo

- Full-stack, location-based social journaling platform inspired by Yik Yak, supporting anonymous posts categorized as low, high, or bizarre moments.
- Built with Next.js, TypeScript, Prisma, PostgreSQL, React

SecureBank – Systems Reliability

- Banking-style web application used as a work sample for security hardening, validation fixes, session management, and transaction integrity.
- Built with Next.js, TypeScript, tRPC, and SQLite.

Statify

- Built an interactive guessing game where users predict Spotify artists' listener counts via live API data.
- Built with React/React Native, Expo, Flask, Beautiful Soup, Spotify API.
